

EVA AI — Terms of Service

Last updated: 21 August 2026

App: EVA AI (com.eva.app)

By installing or using EVA AI you agree to these terms.

1. What the service does

EVA AI shows electric vehicle drivers the charging stations near them, their known prices and technical details. Optionally, it reads your vehicle's charge level through an OBD-II adapter and warns you when the level drops.

2. Accuracy of data — important

Station and price information comes from third-party sources (Open Charge Map and charging network operators). This information may be:

- Out of date,
- Incomplete,
- Different from the station's actual state.

The app **never invents** a price it does not know — unknown values are shown as "—". However, values we do show may still be wrong at source.

Range estimates are estimates only. Real range varies significantly with driving style, temperature, gradient and vehicle age. Do not plan a journey on the app's range estimate alone.

Liability: We are not responsible for losses arising from a station being closed, a price differing from what was shown, or range proving insufficient. Journey decisions are yours.

3. Driving safety

Do not operate the app while the vehicle is moving. Notifications and on-screen content can distract. Directions open in your phone's maps app; its safety warnings apply as well.

4. Subscription

4.1 Plans

Plan	Price	Trial
Monthly	USD 4.99	3 days free
Annual	USD 39.99	3 days free

Payment is taken **in your local currency**; the amount shown in the app is the amount Google Play has set for your country.

4.2 Free trial

The 3-day trial is offered **once per user**. If you do not cancel before it ends, the subscription starts automatically and you will be charged.

4.3 Automatic renewal

The subscription renews automatically unless cancelled ****at least 24 hours**** before the end of the period. The renewal charge is taken within the 24 hours before the period ends.

4.4 Cancellation

Cancel through **your Google Play account**:

Play Store → Profile → Payments and subscriptions → Subscriptions.

When you cancel, access **continues to the end of the period**; no refund is given for the remaining time.

4.5 Refunds

Refunds are governed by Google Play's refund policy and are processed by Google. Refund requests cannot be submitted to us directly.

4.6 Price changes

If the price changes you will be informed through Google Play before it takes effect, and you may cancel if you do not accept it.

5. Free usage limits

Some advanced features (such as price trend analysis) are ****limited per day**** for free users. The limit resets at the start of the UTC day. Core features — the station list, location and current price — are free.

6. Unacceptable use

- Reverse engineering or modifying the app
- Sending bulk automated requests to the server
- Attempting to bypass security measures
- Scraping data in bulk for commercial purposes

We may suspend access in these cases.

7. Service availability

We aim to provide the service without interruption but ****do not guarantee it****. Temporary outages may occur due to maintenance, third-party service failures or technical faults.

8. Changes

If these terms change, the current version is published at this address.

Significant changes are announced in the app.

9. Governing law

These terms are governed by the laws of the Republic of Türkiye. As a consumer you continue to benefit from the mandatory consumer protection rights of the country in which you reside.
